MAINTENANCE

These Tarkett wooden floors have a Proteco surface treatment and therefore a strong protection against normal wear, abrasion, scratches and stains. Some floors will require more frequent maintenance for increased life span. Generally these products are light coloured floors and hardwax oiled floors, particularly with brushed surface and/or highlighted details. Please always refer to maintenance guidance available on websites.

DESIGN

A timeless floor inspired by the classic modular technique from the 1950s. This revisited design offers a contemporary look thanks to a surface brushing that allows the light to reflect on the surface in new and exciting ways. Each squared lamella is applied by hand, to create a block pattern, on top of of Tarkett's engineered and layered construction. The random combination of nuances in the colour of natural oak allows every installer to compose stunning visual patterns, that will change depending on the installation and the incoming light. Thanks to this wonderful handcrafted work with alternating grain directions, colour variations and twisted designs, every floor becomes a unique and exclusive creation. We like to call it "perfect imperfection".

The pictures only present the colour of the floor. For more details regarding grading and variations see the Grading Book or www.tarkett.com. Tarkett's international range of floors comprises many different products. Some of these may not be for sale in your country. Although every care has been taken to reproduce images that reflect the finished product, the quality of monitor and printer and the nature of wood results in variations in the color and structure of individual planks. When sanding a wooden floor the appearance will change in colour, texture and
